

December 2012

Dear Customer,

EU directive 2002/95/EG, RoHS, has been in effect since 1<sup>st</sup> of July 2006 and will now be replaced by a revised directive, 2011/65/EG, from 2<sup>nd</sup> of January 2013. The new directive implies no changes regarding substances or thresholds but will be expanded gradually to include more types and will cover all electrical and electronic equipment that generates, transmits, or is dependent on electric current or electromagnetic fields if not clearly exempted.

Habia Cable Group products has been compliant with RoHS but if specific customers have wished to buy non-compliant products for use in exempted application areas we have been able to support these requirements on request.

We do not consider any changes regarding our products when this new directive enters into force. Our interpretation is that from 2019 also cables will be subject to the requirements for CE-marking and technical documentation and we will begin the work to meet the requirements it entails but for the moment no further action is needed.

Habia Cable Group

Sara Magnusson
